Dear Joanne:

Enclosed with this letter is an application for a new me-too pesticide registration, Doom Weed Killer Spray. This product is intended to replace our existing product, Doom Weed Killer, EPA Reg. No. 44446-24. We have chosen the cite-all method of support. The necessary Application for Registration, Confidential Statement of Formula, five copies of proposed labeling, Formulator's Exemption statement, Offer-to-Pay Statement and Certification with Respect to Data is enclosed. A data-matrix is also attached with the necessary product chemistry data attached where required.

44488601

The new product is substantially similar to the existing product. We are replacing 1,1,1-trichloroethane in the existing product with more of the co-solvent used in the original product. An MSDS for this solvent is enclosed for your review. This application complies with the provisions of PR Notice 92-3 concerning replacement of ozone depleting chemicals in pesticide products.

I am requesting an expedited review of this application. I appreciate your handling this matter expeditiously.

I look forward to hearing from you soon. If you need any additional information concerning this application, do not hesitate to call me at 713-896-8188 ext. 123.

Sincerely,  
**QUEST CHEMICAL CORPORATION**
